

Compressors COLDEX

written by Pro | 18 March 2024

Coldex is a brand of compressors manufactured by Procold S.r.l. They are specifically designed and manufactured for the European market, which demands high quality standards, good reliability, and high efficiency .

Coldex compressorpen_spark

They make compressors for a variety of applications, including water dispensers and refrigerators. They are available in a variety of refrigerants, including R134a and R600a. They also come in a variety of voltages, including 115v, 220-240v, and 12/24v DC.

These compressors are designed for various applications and use different refrigerants like R134a. The models mentioned include SR052Z, LD030Z, and SR045Z, each with specific features such as voltage requirements and refrigerants used. COLDEX compressors are available in different configurations to suit low back pressure (LBP), medium back pressure (MBP), and high back pressure (HBP) applications
